RE: Cultural Resources - Negative Findings for: TPM 20793, Log No. 03-02-068 –  
Mission Ridge Road

Dear Dr. Mallios:

Please be advised that a survey has been conducted on the above referenced project. It has been determined that there are no cultural resources present on this property. The project has been plotted on the attached USGS 7.5 minute topographical map for your information.

County: San Diego

USGS 7.5' Quad: Temecula      Date: 1968      Section: 14      Township:09S      Range: 03W

Address:      Mission Ridge Road  
City: Fallbrook      State:      CA

Thomas Brothers:      1025 G/1

Other Locational Data: The project is located east of Highway 15, off of Mission Road in the community planning area of Fallbrook.

Assessor Parcel Number(s): 108-350-11-00

UTM: 0484417 mE/ 3694599 mN - taken from the approximate center of the project using a Garmin GPS unit.

Elevation: 755 feet, center of parcel

Owner and Address:      Jerome H. winter  
   1101 First Street # 467  
   Coronado, CA 92118

Survey Type:      Intensive Pedestrian  
Date of Survey:      March 24, 2004  
Field Crew:      Gail Wright, Sheliah Vickery

Description: The field survey was conducted using standard archaeological procedures and techniques. For the most part, continuous parallel transects (10 meters) were walked in a generally east/west direction along the flat mesa. Survey conditions in these areas were good to fair, with some areas partially obscured by ground cover in the form of native and non-native

grasses. In areas possessing dense vegetation and deep grass, the survey methodology was adjusted to accommodate surface examination of trails and clearings. Significant drainages with riparian habitat run along the northeast boundary, cutting across the northern quarter of the parcel. The other drainage runs along the southwestern boundary. The northeast drainage contains running water. Neither of the drainages was surveyed due to the steepness of the slopes and dense vegetation. In addition the steep slopes are not conducive to prehistoric living. Although the property contains several species of Oak, no bedrock outcrops for potential food processing were located. The attached aerial photograph shows the general area of survey. No artifacts or features were identified during this survey. This project proposes to subdivide the 19.55 acres into four residential parcels.

If you have any questions, please contact me at (858) 694-3003

Sincerely,

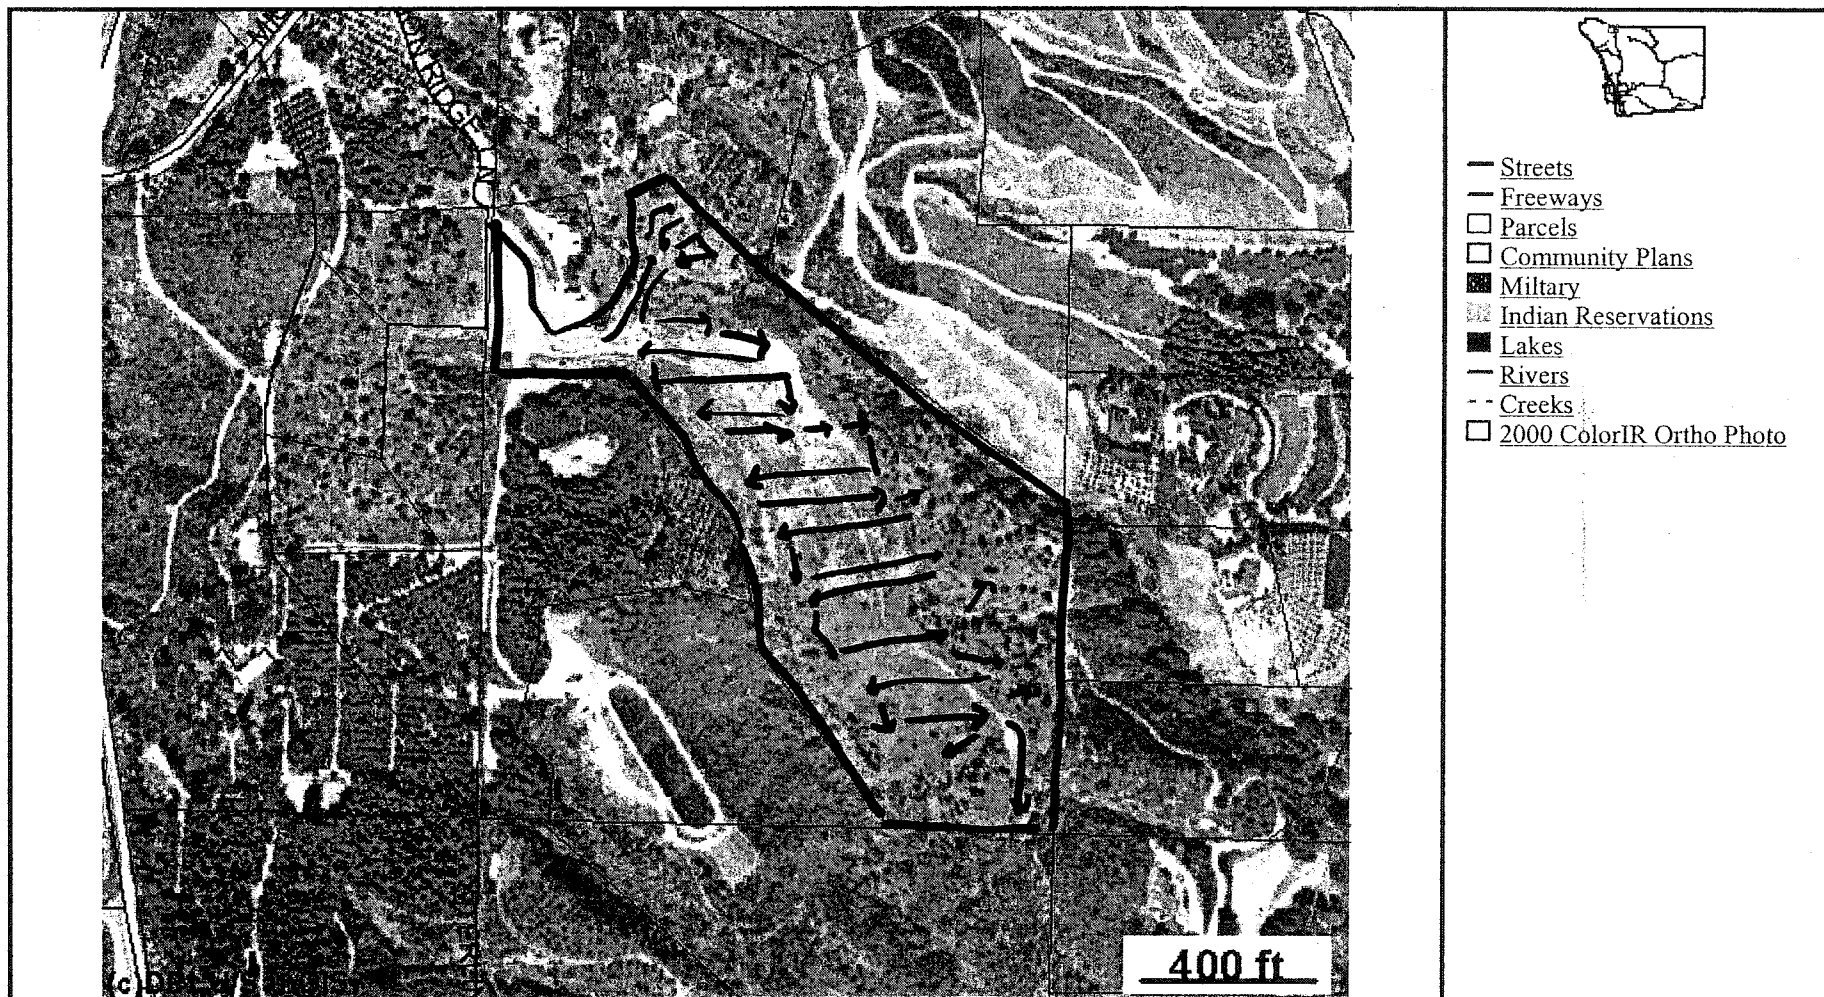

Gail Wright  
Environmental Analyst
